

## AP Psychology Summer Assignment

Ms. Ela Marcom

**Read the book, *50 Psychology Classics***, edited by Tom Butler-Bowdon, being sure to not skip the introduction. For each of the 50 psychologists described in this book, make a note card of the most significant ideas and works associated with this person. Also include a few biographical points about each one, such as dates when he or she lived (or lives), country of origin, education, etc. The edition you read does not matter.

Each note card is worth two points, and needs to have information on both sides (3 by 5 size is fine).

During the first week of school, you will be given a 50 point test to hold you accountable for having read the book- introduction and all. Note cards and other notes you take while reading can be used on this objective test, but not the book itself.

Finally, you will have one class period during the second week of school to write about the book, using one of four writing prompts furnished to you. You may have the book with you as you write. This essay will be worth 50 points.

Assignment Total: 200 points.
